- ✓ Military Grade Security System
- ✓ Ultra High Definition Resolution
- ✓ 360 Degree Panoramic View
- ✓ Multi Directional and Fully Adjustable

RAPIDEYEZ TOWER

RAPIDEYEZ is a rapid deployment tower fitted with a military grade security system ideal for protecting any vulnerable site.

Each tower is fitted with three cameras which have day and night lenses and built in AI self-learning technology to filter out false activations and to promote vehicle and human detection.

The tower is completely battery operated and has 4G connectivity meaning it can be located anywhere and can be relocated by you with ease.

Each camera has a built in PIR capable of detection up to 35 meters. The day and night lenses produce high definition images for identification purposes and all towers are maintained remotely by Sicuro.
